

Item: [HF-FITFLOR](#)

Case Pack: 20 Tiles (approx. 53 sq. ft.)

Tile Dimensions: 19.69" x 19.69" (2.69 sq. ft.)

Tile Thickness: .090" +/- .010"

Backing: Thermoplastic Vinyl Composite

Adhesion: Industrial Adhesive Strips

Product Construction: Tufted Textured Loop

Soil/Stain Protection: FloorProtect

Antimicrobial Treatment: Anti-Bacteria, Mold & Fungi

Yarn System: Type 6 Nylon

Dye Method: 100% Solution Dye

Total Recycled Content: 45% - 52%

FitnessFloor™ is the revolutionary carpet tile for fitness rooms and spas. FitnessFloor™ carpet tiles are designed with a dense construction of premium quality nylon that is built and proven to maintain its structural integrity and resist crushing, even under heavy traffic.

Each FitnessFloor carpet tile has been treated for antimicrobial protection which includes anti-bacteria, anti-fungi, and anti-organism. This means your FitnessFloor™ carpet will stay fresh and clean for years.

FitnessFloor™ carpet tiles are manufactured using a stain resistant coating which extends the life and performance of the flooring and makes the carpet easy to clean.

FitnessFloor™

Less Installation Waste - Less Material Required

- Modular carpet installation typically produces 67% less waste than conventional broadloom.
- Non directional carpet tiles installs with 1.5% waste vs. as much as 14% for broadloom.

Lowers the Cost of Change

- Modular carpet can be installed or replaced with furniture & fitness equipment left in place.

Easy to install

- Modular carpet allows for faster installations than conventional carpet.
- Modular carpet can be installed in any pattern or direction.
- "Glue-free" installation simplifies installation, removal and replacement of flooring.

Good For The Environment

FitnessFloor™ greatly reduces any negative impact on the environment with a low environmental footprint. The installation process of FitnessFloor™ improves air quality by eliminating the need for materials that contain harmful volatile organic compounds. FitnessFloor™ carpet tiles and the adhesive strips are also easily recycled.

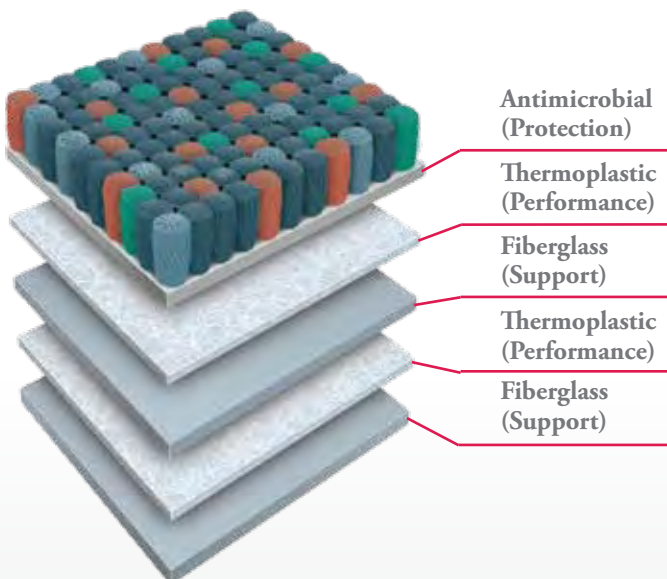

Fresh & Clean

FitnessFloor™ carpet tiles are treated with a non-toxic broad-spectrum antimicrobial preservative, that inhibits the growth of mold, bacteria and fungi that can contaminate your carpet and compromise indoor environmental quality. This promotes fresh and odor free flooring.

Superior Strength

FitnessFloor™ carpet tiles use premium, commercial grade fibers with a low modification ratio of 2.5 or less, an industry recognized standard for premium performance. Premium fiber combined with a dense face construction results in a product that is built to maintain long-term appearance.

Thermoplastic vinyl composite material, reinforced with fiberglass offers optimum stability and performance.
