Weight Stacks - 3 Years
Bearings, Guide Rods - 3 Years
Pulleys, Cams - 3 Years
Cables & Labor - 1 Year
Handles, Accessories - 120 Days
Upholstery - 120 Days

Easy To Use - Users no longer have to adjust equipment to fit their body. With little to no adjustments required, users can simply pick up the handles and start training. Many pieces in the circuit are ADA compliant for wheelchair accessibility.

Functional Versatility - The most versatile strength equipment in the weight room, users can train in virtually any movement pattern. The combination of extensive cable travel, independent arm movement and unique swivel pulleys accommodates a wide range of motion.

User Safety - Safety in a fitness facility is priority. Enclosed weight stacks limit access to moving parts and unique platforms have grip texture to help ensure user stability and safety.

Quality Construction - Heavy-duty cable, industrial grade steel tubing, stainless steel kick plates, and powder-coated finish combine to create bulletproof machines.
